

Service Offering

Virtual Pipeline

Using portable equipment, we deliver natural gas to end users in the form of LNG, CNG, Field Gas, Liquefied Ethane, or other natural gas fuels as required. Our target markets include oil & gas, industrial, midstream, marine, agriculture, rail, and mining.

Dual Fuel Engine Conversion and Management

As a turnkey solution provider, we perform the conversion of diesel engines and other peripheral equipment to accept LNG, CNG, and Field Gas. Additionally, as a value-added service, we provide dual fuel management to assist the end user in achieving their economic savings goals.

Stranded Gas Production

We offer Oil & Gas companies a service whereby they can produce stranded gas wells when pipeline infrastructure is unavailable, and also monetize flare gas.

Power Generation

We provide LNG, CNG & Field Gas fueling for remote power generation as backup, or primary, fuel supply for power plants and onsite generation.

Additional Services

Data collection and analytics, facility O&M, and installation of permanent facilities create a full suite offering for our customers.

Target Markets

- Oil and Gas
- Pipeline
- Marine
- Mining
- Power Generation
- Rail
- Industrial
- Agriculture
